

TRANSCRIPT: Julie, Lia's mum

Support from the school nurse

Linda, the school nurse used to be Lia's respite nurse so knows Lia incredibly well. The school nurse gives her her medication. She also makes clinics so that me and Lia can get to see her consultant, who we do see in school. I have a very good relationship with her and we talk a lot on the 'phone and probably meet once a month in clinic. Lia suffers a lot with epilepsy and if Lia's having a big epileptic episode, the nurse can come in and see whether she needs any more intervention, more medicine. We wouldn't feel confident at all without the nurse being here.
