

TRANSCRIPT: Effect on Harvey's twin sister

Simon, Harvey's father

It's definitely made Lydia more mature and more self-aware and she's grown up more quickly. No doubt about it.

She sees herself as an equal to Harvey but it's not been like having twins in the normal sense of the word because she has always seen herself as the older sibling in a way, even though she's 14 minutes younger.

But they squabble, they fight on the floor, they play the same way. So he's not any less of a sibling and, in fact, he'll bait Lydia in the same way that a little brother would bait any older sister in the same way, no different.
