

TRANSCRIPT: Determining understanding of basic vocabulary (Zoe)

Zoe Martin

Zoe's five years old and she has a speech and language delay so, at the minute, she understands single spoken words that are familiar to her.

The assessment today was to check her level of understanding at a two word level. The first activities that I worked on were to do with object and place.

I also did action and object, where she's got to understand the action and she's got to understand the object.

We use objects first and then we use the cards. It's to show that she understands that the object is the same as on a picture, so it's just a progression.
