

TRANSCRIPT: Pre-verbal communication – Object permanence

Chris Cooper

Once he's shown a preference for something, will he search for it out of his immediate environment although he's seen, quite plainly, that it's been hidden.

Bailey has as very complex health needs and along with that he does have a series of noises that he makes that sometimes can sound as though he's distressed, although Bailey is the most laid back person you'll ever meet in your life!

The thing that amazed me today was, I was quite sure in my own mind that he would begin to explore and find that favoured thing once it was hidden but he seemed to find that that was just a step too far today and he was quite happy to get up and explore what else was available in the room.
